# Preface

The 2013 International Conference on Geo-Informatics in Resource Management and Sustainable Ecosystem (GRMSE 2013) was held in Wuhan, China, during November 8–10, 2013. GRMSE 2013 aimed to bring together researchers, engineers, and students working in the areas of geo-informatics in resource management and sustainable ecosystem. GRMSE 2013 featured a unique mix of topics including smart city, spatial data acquisition, processing and management, modeling and analysis, and recent applications in the context of building healthier ecology and resource management.

We received 522 submissions from various parts of the world. The Technical Program Committee worked very hard to have all papers reviewed before the review deadline. The final technical program consisted of 136 papers. There were four keynote speeches, 5 invited sessions. All the keynote speakers are internationally recognized leading experts in their research fields, who have demonstrated outstanding proficiency and have achieved distinction in their profession. The proceedings are published as two volumes in Springer's *Communications in Computer and Information Science* (CCIS) series. Some excellent papers were selected and recommended to the *International Journal of Computational Science and Engineering*, *Sensors & Transducers Journal* and *International Journal of Embedded Systems*. We would like to mention that, due to the limitation of the conference venue capacity, we were not able to include many fine papers in the technical program.

We would like to express our sincere gratitude to all the members of Technical Program Committee and organizers for their enthusiasm, time, and expertise. Our deep thanks also go to many volunteers and staff for the long hours and hard work they generously gave to GRMSE 2013. We are very grateful to Wuhan University and Eastern Michigan University for their support in making GRMSE 2013 possible. The generous support from the Joint International Center for Resource, Environment Management and Digital Technologies (JIC-REDT), International School of Software, Wuhan University, is greatly appreciated. Finally, we would like to thank all the authors, speakers, and participants of this conference for their contributions to GRMSE 2013, and we also look forward to welcoming you to Michigan in 2014.
